

ENVIRONMENTAL POLICY

WISE UP Workshops aims to conduct its activities with consideration of its environmental impact and to use sustainable resources as much as is possible. WISE UP Workshops will approach its endeavours about sustainability and aims to 'reduce, reuse, recycle'

The policy is supported by an environmental action plan, which will specify WISE UP Workshops actions toward being a more sustainable and environmentally aware organisation. The Environmental Action Plan will be reviewed and updated annually by the facilities manager.

WISE UP Workshops will review and update its environmental policy annually in line with it's Environmental Action Plan.

The following are the areas in which WISE UP Workshops can reduce its environmental impact detailed in the environmental action plan:

MONITORING

ENERGY

Heating cooling and ventilation

Equipment

Lighting

Insulation

Boilers

Support renewable energy

WASTE

REDUCE REUSE RECYCLE

Reduction

Recycling

Travel

Green/Environmental response

At Wise Up we try to apply green thinking throughout all we do, not a separate program but a way of doing what we do so for example, stop driving as much, recycle, compost, better office/working space energy efficiency, “think green” all the time, make it a way of life, build a green image in the community, show measurable results, be green leaders for our attendees and wider community, train our employees and volunteers.

At Wise Up, we apply green thinking to every action and every decision to benefit

our customers, our community, our employees, and our volunteers. We are committed to making a positive impact on the environment by becoming effective at developing and implementing green strategies in our everyday activities

We have a focus on reducing carbon footprint by reducing energy use (electricity and gas) and reducing vehicle emissions. Reduce waste in day-to-day office operations. Implement a green training program for all employees and volunteers.

We are dedicated to taking the following actions to achieve our green vision:

- Reduce our organisations carbon footprint
- Reduce the amount of waste our company produces
- Increase our green knowledge through regular training and awareness raising in the work
- Try to apply green thinking to every action and every decision to benefit our customers, our community, our employees and volunteers.

We are committed to making a positive impact on the environment by becoming proficient at developing and implementing effective green practices and procedures as a rule, not as an exception.
